UNIVERSAL SERIES TIP

2 1/2" PAIRED ROW WITH 3/4" VERTICAL SEPARATION

At Dutch we are constantly improving our products to give farmers more choices. One of our more recent products is a new tip (Part Number 2850) that fits our Universal Series Bodies.

The new, patented tip provides extra vertical separation over the standard 2 1/2" Universal Paired Row Tip. This new tip creates a trench approximately 3/4" deep for the fertilizer to be placed, while maintaining 2 seed rows approximately 2 1/2" apart.

This new tip is ideal for the farmer that wants just a little more separation.

GRADE 8 BOLTS, NUTS AND HOSE CLAMPS INCLUDED WITH EVERY OPENER PURCHASE!
