SPECS

IMPROVED UNIVERSAL SERIES BODY TO FIT CNH PRECISION DRILLS

At Dutch we are constantly improving our products to solve the issues that farmers see. One of our more recent product changes is to the Universal Series Body to fit CNH PRECISION Drills (Part Number 4040).

After talking to farmers they told us that trash is a major issue with these new drills. We took this information and did extensive field testing to improve the trash clearance of these openers.

Here is the final product. Streamlined with a more curved front face to help trash clearance and reduce draft requirements. Also check out all the new tips that will fit the new and improved Openers to fit CNH Precision Drills.

GRADE 8 BOLTS, NUTS AND HOSE CLAMPS INCLUDED IN EVERY OPENER PURCHASE!
